

Activity 1: MY FAVORITES

New Skills Reinforced:

In this activity, you will practice how to:

1. create and save a Word document.
2. retrieve a saved document.
3. save an edited document with a new name (save as).
4. Insert a header, footer, and page break.

Activity Overview:

Using word processing software to create documents has become a common task for millions of people. One of the simplest tasks it can do is also one of the greatest benefits of using such software – saving an existing document with a new name. Before word processing software, one would have to re-create an entire document, even if it required just a few small changes from the original version. With programs like Microsoft Word, an entire document does not have to be re-created in order to make a copy with minor changes. The following activity illustrates how a Word document can be saved using one file name, editing that file, and saving it with a new file name.
